

# CB Gimbal and CB Gimbal Basic

Custom Brackets has once again designed and manufactured a product that is far ahead of its competition. The CB Gimbal is what a gimbal should be. Utilizing precision roller bearings for the easiest pan and tilt makes it the perfect companion for any long lens. The CB Gimbal also introduces new concepts like modular assembly and a setup / travel lever. It is a must have for any photographer seeking the best gimbal available.

## **The CB Gimbal has it all**

- The capacity to handle the longest lenses
- Roller bearings allow for easy pan and tilt
- Modular to disassemble for easy packing and travel
- Maintenance-free; no lubrication needed
- Components for complete versatility using any lens application including attachment to an Arca Swiss type Ball Head
- Separate drag adjustment and lock for pan and tilt using soft rubber coated knobs
- A setup / travel lever; the safest way to balance your lens, travel, and change cameras or multipliers
- All knobs are aluminum and captive, leaving no chance of losing or breaking them
- Bubble level is added to the base for convenience of leveling when needed
- Panoramic head with degree markings for using your camera with a wide angle lens
- The CB Gimbal weighs only 3 lbs - 5 oz.
