

Ringflash Adapter Compatibility

The **RayFlash Ringflash Adapter** is available in a variety of models made specifically for Nikon & Canon flash units (see list at bottom of page). However, feedback from customers who have bought the RAYFLASH for use with other flash units has led us to compile the following list, which shows compatibility with a variety of other flash units and cameras. To facilitate adaptation we offer a simple adapter wedge, suitable to make up the gap between any RAYFLASH and a flash unit that is slightly smaller than the RAYFLASH fitting. The adaptor wedge is small, non-slip and made from flexible black rubber.

Camera & Flash combination other than Canon & Nikon: To establish which model is best suited for a particular combination the distance between optical axis and the middle of the flash units reflector needs to be measured. This measurement will allow the user to find the best match with a Ringflash Adapter:

RAN160 160 mm
RAN170 170 mm
RAN179 170mm
RAN189 180mm
RAC160 160 mm
RAC170 170 MM
RAC175 175 MM
